

BINGO

The more exposure your child has to High Frequency Sight Words, the quicker and more automatically she will begin to recognize them. Here is another activity to reinforce the Sight Words.

- Call out words at random from the List that you're reinforcing.
- Your child must find the word on her Bingo card and cover it with a counter if the word is there.
- Once her whole card is covered, ask her to read the words back to you.
- Swap places with her and let her call out words, watching to see that you cover the correct word with your counter. Make some deliberate mistakes and let her correct you.
- I have included a blank Bingo grid for you to use with any other words which she needs to learn – perhaps words which she struggles with in her reading book, or words from school which have to be learnt, or those Sight Words which she has trouble with in her Speed Drill.
