

## SPEED DRILL

- Make 2 copies of the High Frequency Sight Words Lists – one for your child to read from and one for you to note the errors.
- He is going to see how fast he can *correctly* read the words as you time him for exactly 1 minute.
- He must start reading List 1, continuing through List 2, then List 3, as the time allows.
- As he reads, underline his errors on your list. *Do not* correct him while he is reading.
- Circle the word which he stopped on.
- Count how many words were read and deduct the number of errors.
- Copy the Speed Drill Graph and colour in the bar up to the number of words read correctly.
- His goal is to read past his previous score at each attempt.
- Help him read his errors correctly.
